

## **Attention All SKHA Water Customers**

### **EFFECTIVE IMMEDIATELY**

The SKHA Water & Sewer Department our foremost priority is to ensure that every member of our community has access to safe, clean, and reliable drinking water. We take this responsibility very seriously and have been diligently monitoring the levels of our water tanks and wells, which are essential sources for our communities.

In light of a hot and dry summer forecast, we are facing significant challenges that may affect our water supply. To maintain the quality and quantity of drinking water that you deserve and rely on, we find it necessary to implement specific watering restrictions.

These restrictions are designed not only to conserve our water resources but also to ensure that we can continue to meet the demands of all our customers. We understand that these changes may be inconvenient, and we appreciate your understanding and cooperation during this critical time. Together, we can make a meaningful difference in safeguarding our water supply for the future.

Thank you for your support and commitment to responsible water usage.

### **The outdoor watering Schedule is as follows:**
